

The Citrix Directories

In ArcCatalog, all the Citrix directories can be viewed.

Use the Connect to Folder button to connect to the H:, J:, L:, and M: folders in Figure 1. Create the mygisfiles folder on the client's C:\Documents and Settings\

ArcCatalog connections used most often by Citrix users:

Drive	Description
V:\Documents and Settings\ <YourLocalUserName>mygisfiles	Drive that is the client's :\Documents and Settings\ <yourlocalusername> (client="" a="" and="" c:="" connection.="" directory="" directory.="" down="" drive="" drive)="" drive).<="" entire="" in="" map="" mapping="" settings\<yourlocalusername>="" slow="" td="" the="" to="" v:="" v:\documents="" will=""></yourlocalusername>>
H:	Citrix Home Directory. The Citrix user only has access to this drive
J:	A shared drive among Citrix users. The common directory is shared by all Citrix users and is to be used as a temporary place to transfer files between users or groups. Directories defining groups (i.e., lojic, msd) can be shared by Citrix users within that group.
L:	LOJIC data directory.
M:	An accessible drive containing layer files and map documents.
Database Connections	Connections to the SDE Oracle database.
