Installing/Configuring the VMWare Horizon client.

Check to see if you already have the VMWare Horizon client software installed on your pc. Click on the Window Start button and scroll down the list of programs or type "VMware Horizon Client" in Search.

If it is not installed on your computer, go to the <u>VMware download center</u>.

Product Downloads	Drivers & Tools	Open Source	Custom ISOs	OEM Addons			
Product				Release Date			
VMware Horizon Client for Windows							
VMware Horiz	on Client for Windo	ws		2022-04-05	GO TO DOWNLOADS		

If you do not have admin rights to install software, put in a helpdesk ticket to your IT department to install this on your computer. Provide the link to download the software.

If you do have admin rights, click Download button. Install the client software on your computer.

After it is installed, start the client software and create a Shortcut in Desktop or Pin to Taskbar.

Configuring the VMware Horizon Client

Open the VMware Horizon Client program and Select Add Server (Top left corner).

Type <u>https://horizon.louisvillemsd.org</u> into the Connection Server. Select **Connect.**

S VMware Horizon Client						
Enter the name of the Connection Server						
https://horizon.louisvillemsd.org]			
[Cancel	Connect]			

This only needs to be done the first time accessing the server on a device.
