## Setting Up a Database Connection in ArcGIS Pro

Open a Project and in the Catalog Pane, go to Databases, then double-click on New Database Connection.

Catalog		≁ † ×	
Project Portal Favorites			
🛞 🔝 Search Project			
🖻 🗃 Toolboxes			
A 🔂 Databases			
▶ 🔂 Myi	🖻 Add Database		
	🖹 New File <u>G</u> eodatabase		
	New Mobile Geodatabase		
	New Database Connection		
	New OLE DB Connection		
í	🖻 <u>P</u> aste		
d R	🕃 Refresh		

A Database Connection window will appear. Set the Database Platform to **Oracle, Type** in the Instance **gisprep.** (Versioned editors: Also create a connection to **gistrap.**) Set the Authentication Type to **Database authentication**. Enter your **Database** username and password.

Database Connection	Х
Database Platform:	Oracle *
Instance:	gisprep
Authentication Type:	Database authentication *
User Name:	
Password	
Save User/Password	
	OK Cancel

## IMPORTANT: UNCHECK THE SAVE NAME/PASSWORD OPTION BELOW THE PASSWORD ENTRY FIELD. Failure to uncheck these options will cause major problems in the future.

Click **OK**. A connection called **gisprep.sde** will now be available for selection. This connection will remain available for future use.
