THE CHANGE IS COMING

Migration to the new 10.6.1 LOJIC Enterprise Databases

LOJIC User Group Meeting
May 11, 2022
OBJECTIVES

Introduction

Learn about the Cutover
  
  Questions (In Chat) & Answers

Learn about Impacts to ArcGIS Online Users
  
  Questions (In Chat) & Answers

Learn about Impacts to ArcGIS Desktop Users
  
  Questions (In Chat) & Answers

Summary
INTRODUCTION
LOJIC Architecture Upgrade project began in Fall of 2018.
This project involved changing every part of our existing system while maintaining the current production environment for continued use.
As part of this project we have already:
- Migrated from Citrix to Horizon Virtual Network
- Updated from ArcGIS Desktop 10.2.1 to 10.6.1
- Updated from ArcGIS Server 10.2.1 to 10.6.1
- Stood up the new ArcGIS Enterprise Environment first at version 10.6.1 but then upgraded to version 10.8.1.
While still:
- Maintaining the production custom desktop and web applications and services.
- Keeping the Enterprise database (lojicora1) updated and performant. (Includes 2 base mapping/Lidar/Imagery updates)
- Managing (adding and removing) Users on the system

We did this working virtually for 2 years.
THE FINAL STAGE – MIGRATING TO THE NEW 10.6.1 ENTERPRISE DATABASES

Splitting 1 main database (lojicora1) into 3 main databases and changing ALL data related workflows

- All Desktop Users
- Web apps and services
- Versioned Data editors (Parcels, Streets, Addresses, Sewers, Planning layers)

lojicora1 (10.2.1) → Cutover May 17 through 22 → gisprep (10.6.1) → gispub (10.6.1) → gistrap (10.6.1)
THE CUTOVER

Tuesday, May 17 through Sunday, May 22, 2022
DURING THE CUTOVER

• Can use data and services. Can use LOJIC Tools during that time.
• Addresses, streets, parcels and all other data will not be updated.
• New users will not be added starting May 9 until after May 23.
• Applications/services will not be modified.
QUESTIONS

Please put them in the Chat
IMPACTS TO ARCGIS ONLINE
DURING CUTOVER

- Data used in mapping services will not be updated.
- The geocoding service will not be updated as well.
- All the mapping services and geocoding services will still be working.
AFTER CUTOVER – BASE MAP CHANGES

• New Vector tile format for Street Maps, Plan Hydro, Topo
• New LOJIC Dark Canvas street map
• Cached LOJIC Light Gray and LOJIC Basic will be deprecated and will eventually be removed.
AFTER CUTOVER – FEATURE LAYER CHANGES

• Replace services accessing lojicora1 with services accessing 10.6.1 web database.
• Open data portal services accessing 10.6.1 web database will be updated daily/as needed.
  
  ○ Streets, Addresses, Parcels – daily
  ○ Other feature classes the next daily after updates published.
QUESTIONS

Please put them in the Chat
IMPACTS TO ARCGIS DESKTOP
AFTER CUTOVER – ARCGIS & ARCGIS PRO USERS

• The 10.2.1 database (lojicora1) will no longer be updated.
• It will only be available for a few weeks.
• All users will receive new database passwords probably via Web Cargo.

Recommend using password manager software.

Metro: KeePass
MSD, LWC: Secret Server

KeePass is a free, open source password management software.
https://keepass.info/
AFTER CUTOVER – ARCMAP & ARCGIS PRO USERS

• ALL MXDS AND PROJECTS WILL NEED TO BE UPDATED.
  ○ Data Remapper Tool – Updates all MXDs in a directory. Only usable when lojicora1 is available.
  ○ Repairing MXDs and Projects one at a time.

Instructions available in the LOJIC User Portal.
AFTER CUTOVER – VERSIONED DATA EDITORS

• Versioned data is data edited directly in the oracle database. This is limited only to a few people.

• MXDs used to edit versioned data will need to be updated to edit data in the gistrap database. Viewing or background feature classes will be accessing gisprep.

• LOJIC Custom editing apps are already converted.

Versioned editors must post their final updates to lojicora1 by 4 PM on Monday, May 16 and delete their private versions.
MXD CLEANUP FOR ARCMAP USERS

Desktop users should start *now* deleting obsolete MXDs.

Review MXDs in your H: drive and delete obsolete MXDs.

Review MXDs in your shared directories in the J: drive especially subdirectories of former users.
